

# CAT Controller Courier # 02

November 2006

## **Greetings!**

After such a great reaction to the first CAT Controller newsletter CAT has decided to continue producing these letters every month. We welcome you to read through this newsletter and contact CAT Controllers with any questions pertaining to the articles. Thank you for your support and take care

---

## **October Special Success**

CAT Controllers, Inc. annual October Special was a great success. This year our customers SAVED over \$35,000.00 by purchasing during the month of October. Each year the involvement in this special grows tremendously. CAT wants to thank all of the customers that participated. CAT would also like to thank all customers that did not partake in the special, but were patient with our sales efforts. Credits for the special will be issued on October 31st, 2006. CAT again thanks everyone for their involvement in the October Special and wishes all of you good luck with your upcoming installations.

## **2006 Pool and Spa Expo**

This year the International Pool and Spa Expo will be held at the Las Vegas Convention Center Las Vegas, Nevada USA. Exhibits will be open from November 29th 2006 through December 1st, 2006. CAT Controllers, Inc. will be exhibiting at this show for our 12th consecutive year. This year the CAT Controller's Display will be located at Booth Number 2417. We would like to invite everyone interested to please stop by and meet the CAT Team and to explore our product line up. The Pool and Spa Expo is a great opportunity to see new products, to be educated on new industry trends, and most importantly a chance to network with all of the great people in our industry. We hope to see you all there in Las Vegas this year.

## **Salt Chlorine Generation Applications Guide**

CAT Controllers has recognized the growing presence of salt chlorine applications and has continued to manufacture controllers that will interface with any and all types of salt chlorine generators. We have now produced an applications guide which will provide you with a better understand and some instruction on how to utilize the benefits of automated chemical controllers in conjunction with salt chlorine generators. It is very important to understand that there is a strong relationship between your

chlorine and pH levels. Using an pH/ORP controller in conjunction with a salt chlorine generator will help keep better water chemistry, which in turn will keep your water safe and extend both the life of your pool and pool equipment.

---

### **Winterization of Your Automated Chemical Equipment**

It's that time of year again and you are going to need to remember to not only winterize your pool but to winterize your automated chemical feed equipment. Here are some easy steps to take when winterizing your equipment. Steps to winterization of automated chemical equipment:

1. Remove sensors from the flow cell or out of the return line. Locate sensor storage caps, fill caps with clean water (adding table salt to water, optional), and thread sensors into the storage caps. You should be sure to store the sensors at room temperature (72 degrees).
  2. Drain flow cell and tubing, leaving the flow cell valves open.
  3. If you are using a peristaltic pump you should run clear water through the pump and feed tubes. Than run pump until dry.
  4. Controllers that are installed outside, which may be exposed to extreme winter weather, you may want to store indoors.
