INDUSTRY-BEST SANITIZATION STARTS WITH INDUSTRY-LOWEST HEAD LOSS.

HydraPure™'s advanced oxidation process combines the germ-killing properties of UV with the shock power of ozone to form hydroxyl radicals that destroy 99.9%* of chlorine-resistant microorganisms. Engineered for lowest-in-class head loss, HydraPure works with your chlorination system, reducing chlorine demand by 60% while creating incredibly clean, crystal clear pool water.

Ozone inactivates organic compounds and stops chlorine byproducts from forming

Advanced performance capability operates at both very low and very high flow rates, offering lower head loss at all flow rates than other leading brands

UV combines with ozone to create **hydroxyl radicals** that destroy 99.9%* of chlorine-resistant microorganisms

Durable design is easy to winterize and strong enough to withstand any weather conditions

INCOMPARABLE WATER QUALITY

HydraPure not only provides an added layer of sanitization—it reduces irritating chloramines for softer, gentler water, too.

LESS CHLORINE MAINTENANCE

UV and ozone protection reduces the amount of traditional or salt chlorine required for effective sanitization.

FITS EASILY—ANYWHERE

All-in-one design makes HydraPure simple to install, and a rotatable control panel with notification lights makes maintenance easy, too.
