SALT CHLORINATION SYSTEM

The World's #1
Salt Chlorinator

SANITIZATION

Convenience and Comfort.

The best value from the #1 company in salt chlorination.

Forget about mixing, measuring or messing around with liquid or tablet chlorine. Say goodbye to red eyes, itchy skin and heavy chemical odors. Now there's an easier, more efficient and cost-effective way to satisfy 100% of your pool and spa sanitization needs – and enjoy water that's always clean, clear and luxuriously soft.

More Hayward® salt chlorination systems have been installed in the U.S. than any two other manufacturers combined. Look for genuine Hayward salt chlorination – the #1 brand people trust.

Approximate teaspoons per gallon.

USE A MINIMAL AMOUNT OF SALT

A teaspoon of salt per gallon is all it takes. Salt won't wear out or evaporate; it's used over and over again. So day-in and day-out, you have fresh, pure salt chlorine introduced evenly throughout your swimming pool and spa. Salt-chlorinated water is perfect for plaster, pebble, vinyl and fiberglass pools up to 40,000 gallons.*

*For pools over 40,000 gallons, look into Saline C™ 6.0, ideal for residential pools up to 125,000 gallons.

TurboCell Model	Pounds of Chlorine Produced**
T-CELL-3	210
T-CELL-9	385
T-CELL-15	580
T-CELL-15LL	710

TURBOCELL® SALT CHLORINATOR CELLS

Independently tested and proven by the National Sanitation Foundation (NSF), genuine Hayward TurboCell technology has been reliably delivering salt chlorine for nearly two decades. With savings of 50% or more over conventional chlorine costs, it's not only the #1 salt chlorination cell in the world, it's the best value. Other replacement cells offer significantly less life and less chlorine. Compare for yourself.

**Equivalent pounds of Trichlor produced over the lifetime of the cell with properly maintained cell and water chemistry.

SALT CHLORINATION FOR IN-GROUND POOLS

AquaRite® Pro with Sense and Dispense®

Automating your pool chemistry has never been easier. The professional-grade AquaRite Pro salt chlorinator takes pool and spa sanitization and chemistry management to new levels, building upon the industry-leading salt chlorinator – AquaRite. This integrated solution automatically senses chlorine and pH levels and dispenses a self-renewing supply of pure chlorine generated from salt while controlling pH. Integrating chemistry automation with sanitization eliminates the need for an additional device on the pool pad and lowers installation costs. So now you get the most consistent water quality possible – for water that's brilliant, soft and silky smooth.

AquaRite

The World's #1 Salt Chlorinator

Hayward's AquaRite salt chlorinator is the convenient alternative to conventional chlorine – bringing your pool the very best in soft, silky water with no more red eyes, itchy skin or harsh odors. It's remarkably convenient, too, automatically delivering salt chlorine for the ultimate swimming experience. And AquaRite is independently certified by the National Sanitation Foundation. With the industry's best warranty support, plus 50% or more savings over conventional chlorine, no wonder it's the World's #1 salt chlorinator today.

AquaRite 120

AquaRite 120 is the newest member of the AquaRite family. It turns salt into chlorine, automatically – at a savings of 50% over conventional chlorine.

AquaRite 120 is pre-wired for fast electrical connection. It plugs into any 120V GFCI-protected outlet – lowering installation time and costs.

SALT CHLORINATION FOR ABOVE-GROUND POOLS

AquaTrol®

The perfect choice for above-ground pool owners, Hayward's AquaTrol chlorinator provides convenient above-ground pool sanitization for a smooth swimming experience the whole family can enjoy. It includes the salt chlorination control unit, an 18,000-gallon TurboCell chlorinator cell and a plumbing kit.

HOW TO ORDER SALT CHLORINATION

Choose the salt chlorinator right for your lifestyle and pool. Each product includes a Hayward® TurboCell® salt chlorinator cell. After you've selected your salt chlorinator, choose further options.
