The Safety of Hayward® LED Technology

Our light is made entirely of high impact plastic with an unbreakable lens, no exposed metal components and a 2-wire, low voltage lighting system. It also allows light placement as close as 4 inches below the water line allowing for installation flexibility.

UNIVERSAL COLORLOGIC WITH PRO LOGIC IS JUST TOO LOGICAL

Combining our Universal ColorLogic with a Pro Logic control unit just makes sense these days. Not only do you upgrade to 101 colors and 11 color-changing shows — all adjustable for speed, motion and brightness — you can totally automate a pool, spa and backyard.

Pool owners get more leisure time by automating pH and sanitization, filter cycles and more. Pro Logic also lets pool owners control backyard functions like patio and yard lights, pond pumps and fire pits.

*Based on measured test data at time of print.

The Capability of Hayward LED Technology

For additional information, please see our website. For new installations, the revolutionary shallow pool niche that does not require bonding or grounding allowing further savings on installation and materials.
