

PoolComm® WEB INTERFACE AND MOBILE APP

Remote Water Quality
Management Tool

Now monitors
TDS and Salt
readings

PoolComm is a revolutionary way to manage the water quality of multiple commercial pools and spas from a single remote location. This interface allows detailed monitoring and adjustment of pH, ORP, conductivity/ NaCl, compliance documentation and more, all through the internet or PoolComm mobile app. Any computer, iPhone®, Android™ or web-enabled mobile device can manage a pool. The PoolComm App affords commercial pool servicers, operators and managers greater convenience and flexibility when monitoring water quality at their various facilities. The app is now available for FREE download for iPhone and Android.

- New Wi-Fi® communications option allows free access to PoolComm anytime
- Get direct control of systems from any web browser
- Monitor and display multiple facilities simultaneously
- Receive near real-time detection of pH and ORP problems
- Get color-coded alarm display, with notification by email or SMS
- Promote customer satisfaction by proactively solving problems

PoolComm®

WEB INTERFACE AND MOBILE APP

Specifics of any individual facility can be displayed and adjusted remotely.

- Make the same adjustments you can make from the controller
- Get details of pH and ORP readings and save, email or document
- Identify detrimental patterns and issues
- Adjustment of set points, alarms, and alarm parameters
- Receive email and text notifications during alarm situations
- Make better use of maintenance personnel time
